DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 36-79 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 28-35 of U.S. Patent No. 6,643,248. Although the conflicting claims are not identical, they are not patentably distinct from each other because even though U.S. Patent No. 6,643,248 discloses a plurality of electron emitters to be provided for the data storage device versus only one electron emitter as recited by Applicant's disclosed invention, it would have been obvious to one of ordinary skill in the art at the time the invention of U.S. Patent No. 6,643,248 was made to provide only a singular electron emitter for when a smaller data storage device medium was needed for a higher density device.

Furthermore, there is no apparent reason why applicant did not present the claims corresponding to those of the instant application in U.S. Patent No. 6,643,248.

Relevant Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Moradi, Mishra and Kunugibara et al. each disclose electron emitter devices.
